

## SENIOR RESEARCH FELLOWSHIPS – new call open!

We are pleased to announce the launch of our Senior Research Fellowship scheme for 2015. These fellowships are awarded to outstanding medical or science graduates committed to a research career in any discipline relevant to arthritis and related musculoskeletal diseases, who do not hold an established academic post.

Arthritis Research UK would like to strongly encourage applications to this scheme which are aligned with our new 5 year strategic focus on improving the quality of life of people with arthritis.

Applicants should normally have between 6 and 12 years' postdoctoral research experience, a proven ability in establishing an independent research programme, and be based in a multidisciplinary environment in a UK university department or research institute. We would also welcome applications from researchers who are not currently based in the UK, but are looking to move here, providing they have evidence of support from a UK host institution. Awards will be for up to 5 years and are not renewable.

Further information is available from our website on the [Senior Research Fellowship](#) page or from the Research Department (tel 0300 7900 403).

Application forms may be downloaded approximately 3 months before the deadline date and the process on how to apply is available by clicking the APPLY button below.

The deadline for applications is **WEDNESDAY, 11<sup>TH</sup> NOVEMBER 2015.**
